

Energy / Utilities

Burlington Electric Department (BED)

The Burlington Electric Department (BED) is a municipal utility serving residential and commercial customers.

The Energy Efficiency Advantage Programs

Through Energy Advantage and Top 10, BED will custom design energy-efficiency program improvements with quick paybacks, rebates, and built-in incentives so the customer can reap the benefits of reduced monthly bills almost immediately. BED will also offer “positive cash flow” financing for the recommended improvements. Financing can come in the form of a low-interest loan or rebate.

The Commercial Construction and Equipment Replacement Programs

These programs are designed to help customers exceed Burlington’s required guidelines for energy-efficient construction when building or renovating their facilities or replacing equipment. BED assists designers and owners in the choice of energy-efficient equipment, systems and construction techniques that will meet their specific business and energy needs. Prescriptive and custom financial incentives are offered on qualifying projects.

10% Challenge Program

Through its work with the Alliance for Climate Action and the 10% Challenge, BED has taken a leadership role in encouraging every business and person to reduce their own greenhouse gas emissions by at least 10 percent.

Energy / Utilities

Vermont Energy Investment Corporation – Efficiency Vermont

The Vermont Energy Investment Corporation sponsors Efficiency Vermont, an organization that turns energy efficiency and environmental performance into a corporate asset. Efficiency Vermont can assist businesses by analyzing and recommending energy efficiency options; identifying sources of energy efficient equipment; verifying equipment installation; and providing financial incentives for qualifying equipment.

Vermont Gas Systems, Inc.

Vermont Gas Systems supplies clean, efficient natural gas to more than 30,000 homes and businesses in Chittenden and Franklin counties. Vermont Gas WorkPlace energy efficiency programs are designed for commercial and industrial customers who are installing new natural gas-fired space, water, or process heating equipment; who are renovating or constructing buildings; or who are interested in retrofitting existing buildings for improved energy efficiencies. Vermont Gas provides free engineering assistance to identify natural gas saving measures, and may provide incentives for installing cost-effective measures.

Burlington Telecom: It's Your Network

Burlington Telecom operates a state-of-the-art fiberoptic telecommunication network serving the businesses and residents of Burlington with high quality voice, internet, and cable television services. The network is a complete overbuild of the existing telecom infrastructure in the City.

Burlington Telecom is a privately-funded City of Burlington Department. The City made this investment in a fiber optic telecommunications system in part to strengthen the present and future opportunities for Burlington's businesses and residents. Burlington Telecom is helping retain & create jobs, attracting new businesses, and providing existing businesses access to technology previously unaffordable or unattainable.
